Connect the retort with a refrigerator or Liebig s condenser, and distil the whole to dryness by means of a sand-bath. Or else reduce to powder 3 parts of dry acetate of soda, pour upon it 9-7 parts of pure and very concentrated S03, HO, and at once connect the whole with a Liebig s condenser; one-eighth part of the acetic acid will spontaneously distil over by the heat developed by the mixture itself, and the rest of the acetic acid will pass over upon applying a gentle heat to the mixture. The distillate will probably require purification, which is accomplished by submitting it to a second distillation. If it has been found that it is contaminated by SOa, the best way will be to digest in it some pure oxyde of lead...
